Slim
Jim

Our best tank yet

The new Bailey Slim Jim continues the Bailey tradition of innovation, design and the provision of flexible water management solutions.

With the addition of the Slim Jim Bailey have the most comprehensive urban water management range on the market. The unique design gives unparalleled strength and robustness compared to all other slim tanks on the market and the 100% virgin material used means that in emergencies the water collected is safe for drinking.

Isn't it great to have a Bailey Slimline Tank on tap - all the time

Take your rainwater harvesting or stormwater detention to another level without the expense of underground systems and use the water captured to create a showpiece of colour or an edible garden with the optional vertical garden accessory kit.

The Slim Jim gives you the ability to reduce your water charges, become water self sufficient and eliminate the impacts of drought on your lawns and gardens.

The Slim Jim, with its depth of 325mm and height of 1800 means it can be installed in the narrowest of spaces, hidden from view easily by standard height fences.

The Slim Jim can be secured against fences and buildings or installed standing alone using the seismic restraint kits which have been specially engineered for each of New Zealand's 4 earthquake zones.

Slim Jims can be installed side by side or end on end to create water storage or detention blocks and can act as functional fences or barriers to create different zones within your outdoor space

The Slim Jim – making effective use of space in small urban sections to cover off your compliance requirements or enhance the amenity value of your backyard.

Rainwater harvesting

Collect and store rainwater for use around the home and garden. Perfect for watering the garden and washing cars.

Lightweight

At only 75kg's Slim Jim can be lifted into even the tightest of positions. The hand grabs also assist in the handling onsite.

Ultra slim design

At only 325mm wide Slim Jim is the perfect option for small sites where land is at a premium.

Slim Jim can also be utilised as a fence replacement and multiple tanks can be linked together for larger capacities.

Attractive colour choices

Slim Jim provides a distinctive and modern appearance with contemporary colourways in 11 fantastic colours to match the colour and style of your home.

Pump integration

A submersible pump can be easily installed allowing the rainwater to be used in outside taps, toilets and washing machines. Additionally a Rain Aid valve can be fitted so in the event your tank runs out of rainwater the tank will automatically be topped up from the mains, giving you an uninterrupted supply of water.

Slim Jim Range

Bailey Code	Description	Length	Width	Height	Outlet Size	Lid Size	Weight
BTSJ1000	1000L Slim Jim Tank	2350mm	325mm	1800mm	50mm (x2)	200mm (x2)	75kg
BTSJ-SRK-1	Seismic Restraint Kit - Zone 1&2	-	-	-	-	-	-
BTSJ-SRK-2	Seismic Restraint Kit - Zone 3&4	-	-	-	-	-	-
BTSJ-VG	Vertical Garden Kit	-	-	-	-	-	-

Stormwater retention/detention

From conception Slim Jim has been designed to be an easy and attractive solution for stormwater retention and detention. The flat ends allow for the installation of inlets, overflows and council required orifices.

Optional vertical garden

To further integrate Slim Jim into the urban home a vertical garden is available to purchase as an optional accessory. Vertical garden includes; mounting frame, 8 x mesh mounting panels and 20 x planter pots. NB vertical garden requires seismic restraint kit to be attached to.

PS1

Detailed installation guides along with a PS1 and all other required documentation for council approval (if required) is available.

Seismic restraints

Prefabricated galvanised kits are available that make light work of any seismic restraint requirements.

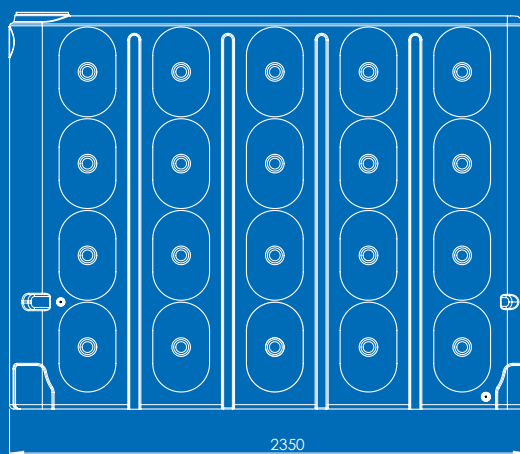

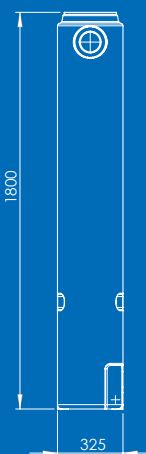

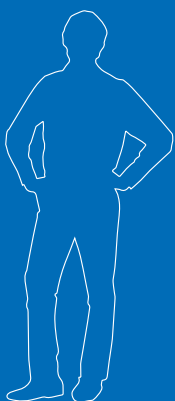

Hand grips (x4)

Recessed hand grips on both ends of Slim Jim allow for easy and safe positioning onsite. Slim Jim can be carried either on end or on its side. No need for expensive lifting equipment.

Recyclable

At end of life Slim Jim is completely recyclable. Return your tank to us and we will recycle the plastic and reuse it in non critical mouldings such as pump covers, pits and chambers.
